

Док. Ч. Канур и Президент России В. В. Путин

THE VILLAGE SCHOOL

A FOCAL POINT OF DIVERSE HUMAN ACTIVITY

1 school
2 district
3 society

- information concerning agriculture, livestock and weather
- post, telegram and telephone
- health, hygiene, dispensary and family planning
- sports, yoga, aesthetics and culture
- savings, banks, loans, subsidies
- energy, solar, wind, water, biomass
- water management, well, river, rain
- trees, plantation, care of diversity and herbal plants
- ethics, moral education, festivals
- wealth

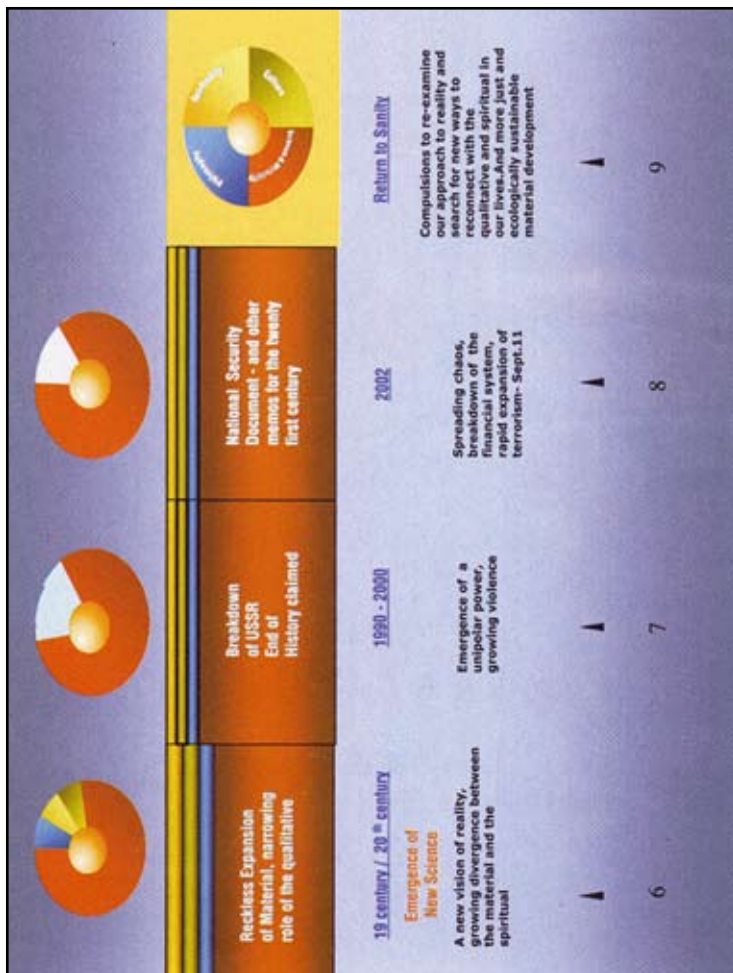

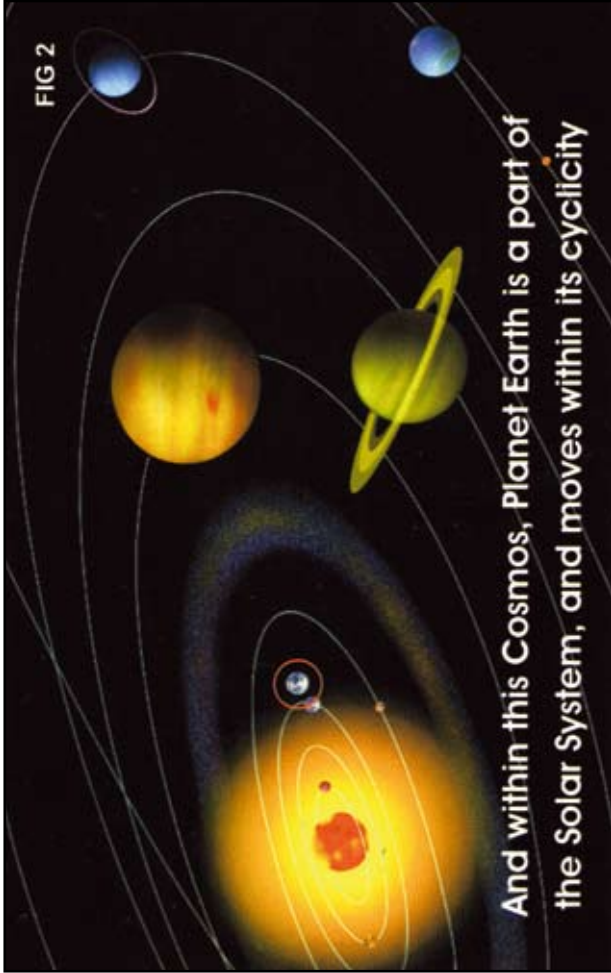

FIG. 1

We are a part of the Cosmic Universe
an infinitesimally small part.
But in the conduct of human affairs,
we always forget this reality.
This is just to remind human beings about its
consequences

Planet Earth with its wide biodiversity and beauty where all natural processes are cyclical

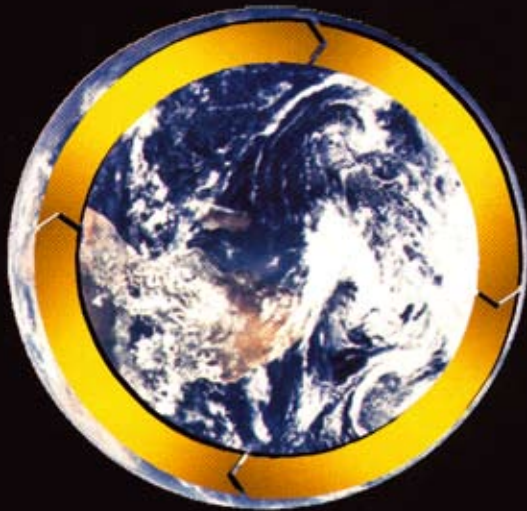

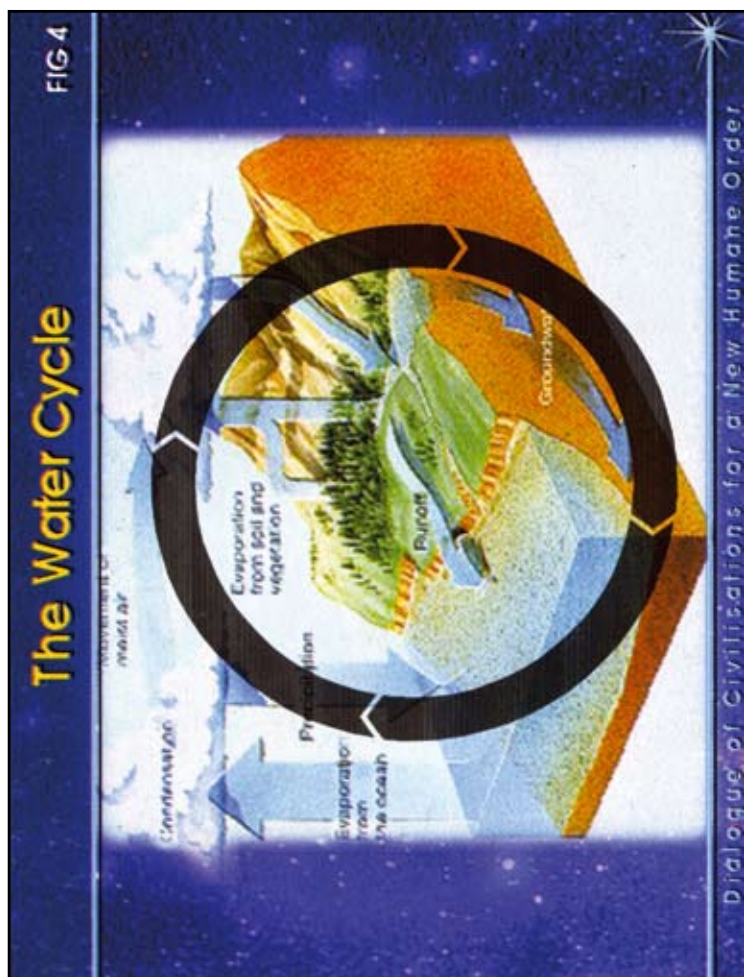

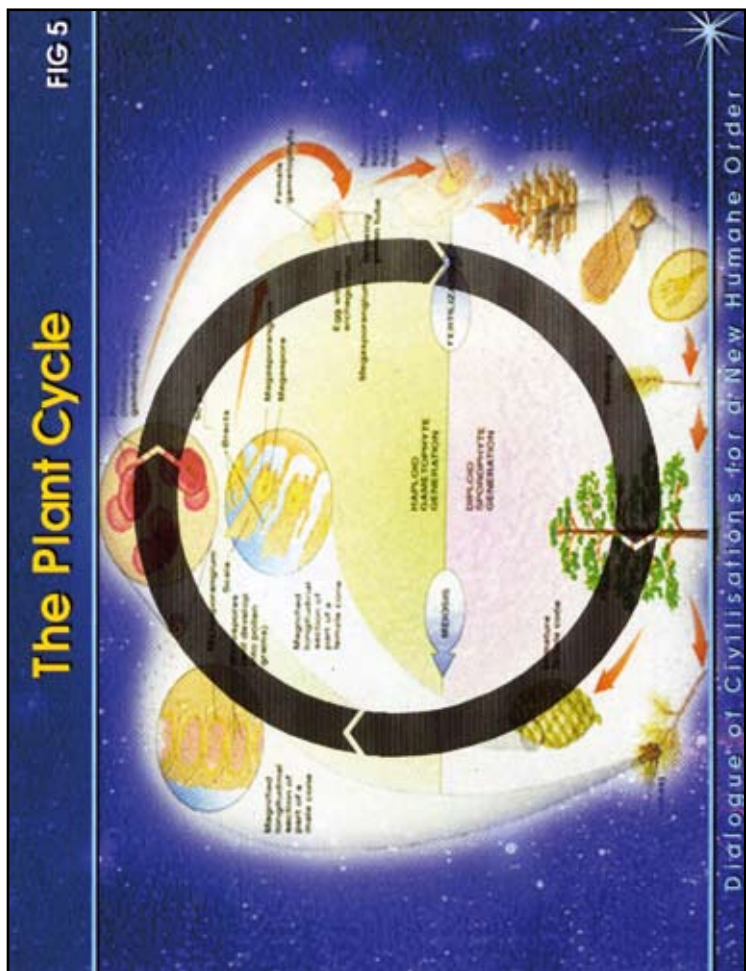

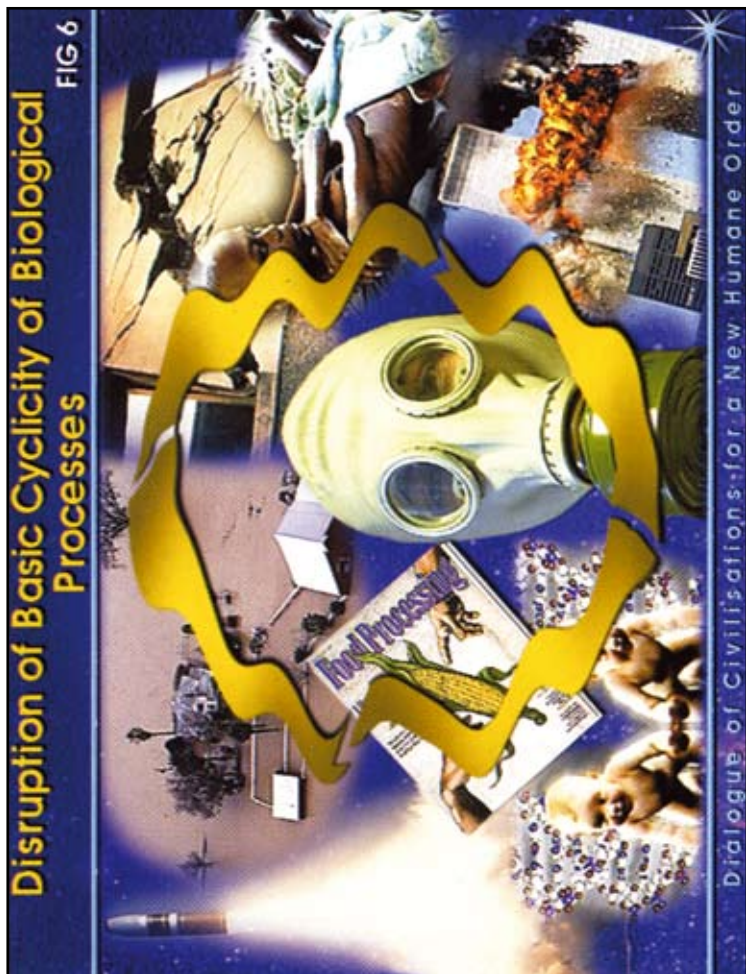

FIG 3

...and everything on Earth moves in an orderly cyclical manner

Disruption of Basic Cyclicity of Biological Processes

FIG 7

+ Climate

Disruption of cyclical processes as a result of atmospheric pollution, ozone layer depletion, deforestation, and weapons of mass destruction. Effects include floods, drought, cyclones, earthquakes, extreme temperatures, polluted water and air.

+ Food Chain

Genetically modified foods i.e. terminator seeds, intervention in the basic energy building blocks, use of pesticides, insecticides, fertilizers, and destruction of productive capacity of land.

+ Human Cloning

Intervention in the human reproduction cycle

+ Biological Disaster

Fallout of the biological warfare, AIDS & SARS

Dialogue of Civilisations for a New Humane Order

Four Pillars of Human Development

FIG 8

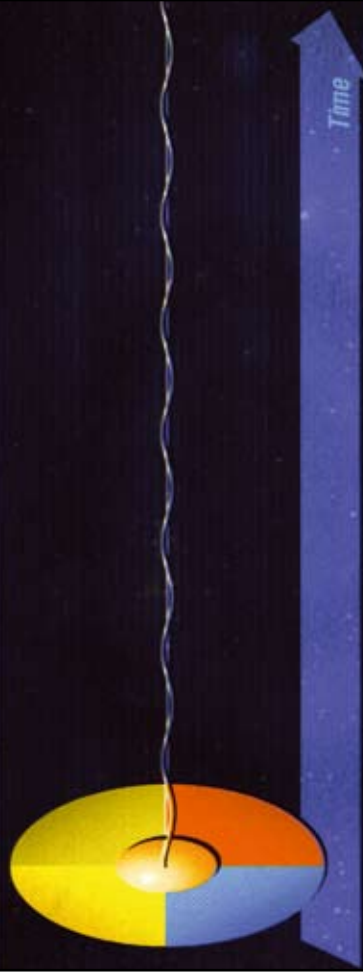

Human social organization is structured around four parameters of Science - Materiality, Philosophy, Culture and Spirituality

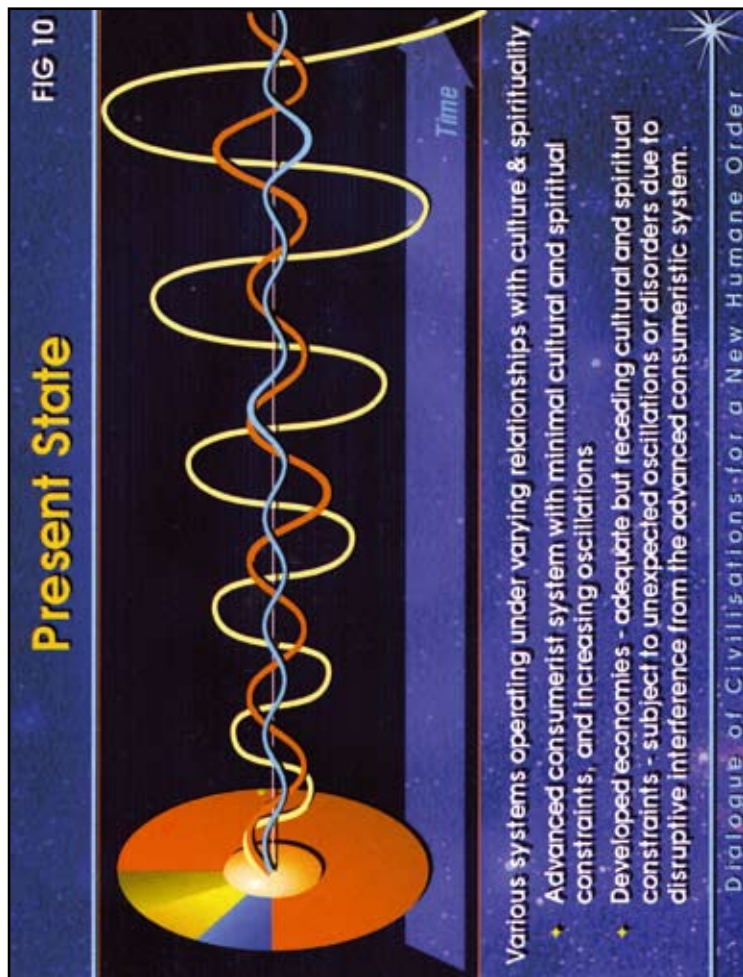

Dialogue of Civilisations: for a New Humane Order

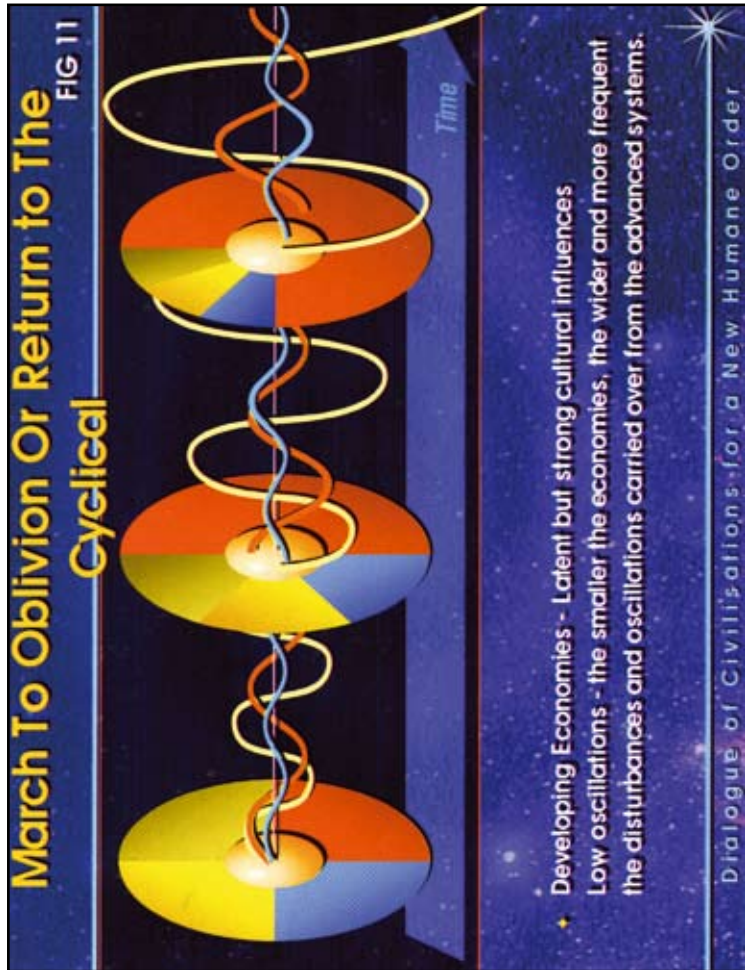

Ideal State

FIG 9

In a cyclic movement, the potential separation of the material from the defining mental or spiritual forces is avoided because these cannot be isolated and are in constant state of interaction. Thus close to the cyclicity a material process remains orderly

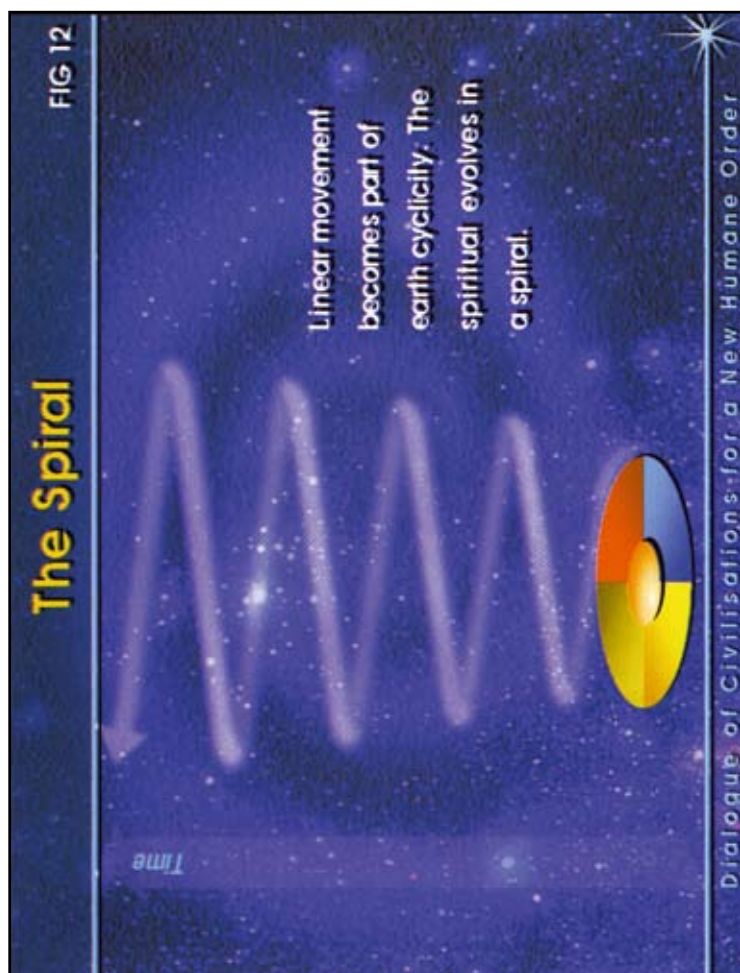

FIG 12
